### HOW TO ORDER:

After determining your requirements, please inform us of the following:

1. Quantities, types, and varieties of products desired.
2. Phytosanitary requirements of your agricultural department.
3. The terms of sale you prefer (F.O.B., C.I.F., C. & F. etc.)

Upon receipt of the foregoing information we will do the following:

1. Issue a formal proposal (Pro Forma Invoice) including estimated shipping costs.
2. Reserve required items for you only after receipt of full advance payment and import permit.
3. Upon shipment, provide you with invoice, packing list, airway bill number, Certificate of Origin, Official Phytosanitary Certificate, and shipping details.
4. After all charges have been determined, send a final invoice charging you for any shortages or reimbursing you for any over-payment.

<sup>1</sup> These prices are F.O.B. Ventura, California, and do not include packaging, documentation, lab testing, air freight, inland freight, or insurance charges. Terms of Payment: Full price must be paid to confirm an order.

<sup>2</sup> Certified means that avocado plants have been grown under special sanitary conditions. These conform to California Department of Agriculture standards and practices designed to protect against infection by *Phytophthora cinnamomi* (root rot). All avocado liners are Certified. The term Certified described above does not imply any warranty on the part of Brokaw Nursery against any plant disease.

## PRODUCT DESCRIPTION SHEET

### Avocado Liners

The avocado liner is a scion-grafted plant grown under greenhouse conditions in a soilless medium composed of peat moss, perlite and coco fiber. This mixture has served as an acceptable medium for importation into countries that will not permit entry of soil. After grafting and growing in the greenhouse, these plants are moved to a shade house for approximately one month to harden them to exterior conditions. They have been raised under Certified conditions with the supervision of the State of California. This certification is your assurance that all possible precautions have been taken to produce plants free from *Phytophthora cinnamomi* (root rot).

The root system is contained in a plastic bag measuring approximately 2 1/4 " (5.7 cm.) in diameter (seedling rootstock) or 3 " (7.6 cm.) in diameter (clonal rootstock). The bag height is 8 1/2 " (21.6 cm.) (seedling rootstock) or 12" (30.5 cm.) (clonal rootstock). The aerial portion of the plant will vary from 6 " (15.2 cm.) to 10" (25.4 cm.) or more in height at the time of shipment.

Upon receipt from Brokaw Nursery, the liners should be planted in large containers for extra nursery growth. Planting and care instructions are available upon request.

### Grafted Liners on Clonal Rootstock

- Packed 32 per corrugated carton
- Carton dimensions (30 1/2 " H x 24 " L x 12 1/2"W) (77.5 cm. H x 60.9 cm. L x 31.5 cm. W)
- Gross Weight - approximately 70 lbs. (32 kg.) per carton
- Delivery: April, May and June
- Order confirmation deadline - the October prior to shipping

### Grafted Liners on Seedling Rootstock

- Packed 50 per corrugated carton
- Carton dimensions (30 1/2 " H x 24 " L x 12 1/2"W)(77.5 cm. H x 60.9 cm. L x 31.5 cm. W)
- Gross Weight - approximately 75 lbs. (34 kg.) per carton
- Delivery: March, April, May
- Order confirmation deadline - the November prior to shipping

Seedling rootstocks have been used traditionally in the Avocado Industry. Clonal rootstocks are a more recent propagation technique developed by Brokaw Nursery. A Clonal Rootstock is one whose genetic characteristics are exactly reproduced. These are distinct from seedling

rootstocks, which are a result of genetic combination and therefore, widely variable.

### Avocado Budwood

We offer a wide selection of budwood varieties. The budwood is picked just prior to shipping and is treated with insecticides and fungicides. It is then dried and packed in a plastic cold container. Budwood is highly perishable. It should be kept cool at all times and used within 1 week of shipping if possible. It will not survive loss of refrigeration or long delays in transit.

- Packaging – Plastic cooler boxes containing the budwood and ice packs
- Package dimensions will vary according to the amount of budwood to be shipped
- Delivery: December, January, and February
- Order confirmation deadline - Two months prior to shipping.
